

## For Concrete Slotted Post Manufacture

### Key Benefits

**Lasts and lasts.** The Euromould polyurethane red cast material is so tough they'll be casting concrete posts for you ten years from now! Euromould polyurethane is used in hundreds of concrete applications in the U.K. and Europe.

**Ease of production.** With the unique Euromould flange design the liner holds its shape in its steel channel and stops any concrete ingress. So, less cleaning & mould damage and therefore producing a better concrete post.

**A better quality post,** the Euromould strong stable polyurethane liner with its solid slots does NOT crinkle or warp. It therefore casts concrete posts with better defined slots and a consistent cross section. This means easier and faster concrete post production and a better finished product.

**For Concrete Slotted Post Manufacture**

### **4 x 4 Intermediate Slotted Post Moulds**

4" x 4" section x 9'6" long  
without shoulder

4" x 4" section x 9'6" long  
with shoulder\*

\*4" x 4" Intermediate Slotted Post Mould liners come with the option of a slot in the polyurethane for creating a shoulder on the concrete post for resting the gravel board upon.

### **5 x 4 Intermediate Slotted Post Moulds**

5" x 4" section x 9'6" long

5" x 4" section x 10'6" long

5" x 4" section x 12' long

### **End Post Mould**

5" x 4" section x 9'6" long  
5" x 4" section x 10'6" long  
5" x 4" section x 12' long

### **Two Way Corner Post Mould**

5" x 5" section x 9'6" long  
5" x 5" section x 10'6" long  
5" x 5" section x 12' long

### **Three Way Slotted Post Mould**

5" x 5" section x 9'6" long

## What makes up a Euromould Slotted Post Mould?

**1 off steel channel + 1 off polyurethane liner + 2 off polyurethane stop ends**

### Types of Stop Ends

Bonaprene offers a wide choice of Stop Ends for the Euromould Slotted Post Moulds. They are available for all types of Euromould Slotted Post Mould: intermediate, end post, two way and three way Moulds. The Stop Ends are also available separately.

Bonaprene also manufacture steel channels and Stop Ends for blue polypropylene and black ABS plastic liners as well as Stop Ends for many types of steel moulds.

#### Pyramid Stop End

#### Bobble Stop End, One Sided & Two Sided

#### Round Top Stop End

#### Pyramid Stop End with Bobble

#### Stop Ends for Steel Gang and Steel Single Moulds

## The Euromould Safe Ease SE2 Release Agent

The Safe Ease SE2 is a high quality specially formulated release agent oil and additive blend suitable for use with sensitive mould materials such as plastic, polyurethane, polystyrene, polypropylene ABS etc. Safe Ease SE2 does not contain any petroleum derived solvents or any components classified as hazardous. Therefore Safe Ease SE2's very high flash point and low odour make it safe for use in confined areas. Results are best achieved with a minimum application. Safe Ease SE2 is available in 25 litre pails, 210 litre drums and 1,000 litre ICBs.

## Euromould Vibrating Tables and Trestles

Our high quality, heavy-duty vibrating tables are supplied with either a single-phase 240v or a powerful 3-phase 415v vibrating motor. Utilising a wear resistant 8mm top plate ensures even and efficient vibration over the whole table surface. The 2m x 1m table is more commonly used for both fencing and paving moulds. Single vibrating trestles are available as an alternative method of mould vibration.

## Euromould Gravel Board Moulds

Bonaprene manufacture a wide range of Euromould Gravel Board Moulds using the same super strong but flexible polyurethane as the Euromould Slotted Post Moulds.

## Euromould Gang Moulds

Bonaprene manufacture many different types of Euromould gang moulds for use with automated precast machine systems. Gang moulds are widely used for paving, fencing, gravel boards and garden edgings.
